Community of Practice Series: Infection Prevention and Control in Primary Care Settings

Our partners at Public Health Ontario (PHO) are hosting a community of practice series for **Infection Prevention and Control (IPAC) in Primary Care Settings**. The community of practice series will review key concepts and support resources for Infection Prevention and Control (IPAC) in Primary Care settings. We highly recommend that **those who oversee or implement IPAC** in your facility **participate** in the sessions to help with their IPAC responsibilities.

The **Primary Care IPAC Community of Practice series** will be held over **four sessions**. The topics include:

- **IPAC risk assessments**
- **Attributes of physical space that support IPAC best practices**
- **Workflow and processes that support IPAC best practices in clinical settings**
- **Auditing IPAC to monitor and sustain best practices**

Dates and Times

- Session 1: IPAC Risk Assessment
 - May 24, 2022, 11 a.m. to 12 p.m. EST
- Session 2: Attributes of Physical Space that Support IPAC Best Practices
