For Health Care Professionals

Referral to the Healthy Babies Healthy Children Program

Healthy Babies, Healthy Children Program

Healthy Babies, Healthy Children (HBHC) is a free program for families which aims to support them with their parenting goals in the prenatal and post-partum period and throughout early childhood up until school entry.

Public health nurses and family visitors work together with families on their goals by visiting them regularly to provide information and support. Visits are offered Monday to Friday 8:30 am to 4:30 pm.

Having a baby can be both an exciting and challenging time for new parents. Areas that can be addressed include:

- Having a healthy pregnancy and birth
- Attachment
- Perinatal Mood Disorders
- Breastfeeding
- Growth and Development
- Positive Parenting
- Accessing other services and programs in the community

Physicians, midwives and nurse practitioners can refer a patient by faxing the HBHC Referral Form found at durham.ca/HCP (under forms, then referrals). Providers can also encourage patients to self refer by visiting durham.ca/HBHC.

Posters, flyers and tear-off pads about the HBHC program are available to order online at durham.ca/HCP under “order resources” then “Parenting.”
